

# Friendship Soup

This is a 1 hour programme about friendships, and how to promote positive behaviours in children in key stage 1. (please note this can be adapted for other primary school ages).

It can be used at any time throughout the year, to help reinforce positive friendships to small groups of children or as a whole class approach.

In this group, children will learn about being friendships while being "chefs". They will "bake away" negative behaviours and add "sugary sweet" positive behaviours. Pupils will create their own recipe for friendship that can be displayed around the school/classroom.
